

JOSUE GONZALEZ

Business Intelligence & Data Analyst

Panama | josue41999@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Bilingual BI and Data Analyst with more than 3 years of experience in data and analytics roles. Experienced with Power BI (DAX), SQL, Databricks (PySpark), advanced Excel, and Power Query to develop dashboards, automate reporting, and transform complex data into actionable information for decision-making. Able to operate effectively across both technical work and communication with business teams and executive stakeholders.

PROFESSIONAL EXPERIENCE

Estée Lauder Companies | **Business Intelligence / Data Analyst** | Nov 2025 - Present

Global consumer goods company, providing financial reporting and analytics support to Financial Strategy and Executive teams across multiple regions and brands.

- Developed and maintained a global financial dashboard in Power BI with more than 20 views, consolidating critical sales and financial performance metrics for FP&A teams.
- Managed and analyzed KPIs including Retail Sales, Gross Sales YoY, Net Sales, Account Contribution, and Commercial Investments across multiple regions, channels, and brands.
- Led the migration of data transformations from Power Query to SQL views and aggregated tables in Databricks, removing bottlenecks in multi-million-row datasets and significantly reducing report refresh times.
- Developed transformation logic in SQL and PySpark to convert hierarchical parent-child financial structures into tables optimized for Power BI analysis, enabling scalable and dynamic reporting.
- Consolidated multiple datasets (Units, Promotional Units, Brand Growth) into a centralized Master Report with Power Query, redesigning the data model to eliminate external dependencies and improve report efficiency.
- Investigated and resolved data integrity issues across a multi-source reporting pipeline (source data, Power Query, and DAX), including duplicates and dimension-table discrepancies that caused incorrect regional classifications across multiple KPIs (Account Contribution, Net Sales, Gross Sales, and Trade Margin), validating results against the CPM source of truth across 6 regions.
- Prepared executive-level financial presentations for the CFO, translating complex KPI analysis (Gross Sales, YoY, MoM) into concrete and actionable business recommendations.

Insignia Resources | **Pre-Billing Specialist** | Jul 2022 - Nov 2025

U.S. home healthcare staffing operation focused on billing-data validation, reporting automation, and data quality control before the billing cycle.

- Validated and processed approximately 300 daily billing-related datasets, including patient and caregiver records for a U.S. home healthcare staffing operation, ensuring data integrity before billing and compliance with internal audit standards and HIPAA regulations.
- Designed and built an operational Excel dashboard for a 17-person team, using advanced formulas and pivot tables to consolidate daily and weekly performance metrics, processed record types, and error rates - improving process visibility and team efficiency by 30%.
- Automated daily and weekly report generation through Excel ETL processes using Macros, data ingestion, and CSV transformations in Power Query - eliminating more than one hour of manual work per day and saving approximately 10 hours per week.

- Developed and presented to management an Excel VBA database prototype for Care Operations, centralizing scattered manual records and enabling structured search for approximately 10 users - reducing data-entry errors and lookup time.

Connect International | **Collection Specialist** | Sep 2019 - Jul 2022

U.S. financial services company providing support in data reporting, payment processing, and data integrity for regulated financial transactions.

- Prepared and analyzed daily Excel reports on large volumes of U.S. customer-account data, identifying payment trends, disputes, and resolution metrics.
- Processed reversed payments, payment arrangements, and account adjustments while maintaining accurate CRM records and ensuring data integrity in regulated financial transactions.
- Ensured compliance with internal policies and applicable regulations related to data handling and financial transactions.
- Collaborated with supervisors in the analysis of escalated cases involving financial hardship or data discrepancies, providing analytical support for decision-making.

EDUCATION AND CERTIFICATIONS

B.A. in English | Universidad de Panamá | 2019 - 2022 | Sigma Lambda Honor Chapter

DA-100T00-A - Analyzing Data with Microsoft Power BI | Florida State University, Panama | Apr 2025

Databases and SQL for Data Science with Python | IBM / Coursera | Mar 2026

International English Scholarship Program | Edinburgh College, Scotland | 2018

TECHNICAL SKILLS

Visualization and BI: Power BI (DAX, modeling), Excel (Power Query, Pivot Tables, VBA)

Databases and querying: SQL (JOINS, CTEs, subqueries, aggregations), Databricks (PySpark)

Data analysis and preparation: Foundational Python (Pandas, Matplotlib, Seaborn), Google Sheets, Power Query, data cleaning and transformation

Integration and pipelines: Data ingestion from APIs / SharePoint, CSV pipelines, Databricks SQL, Salesforce CRM, and ERP systems.

Business tools: Financial reporting (FP&A), operational analytics, executive presentations

Languages:

- Spanish (Native) | English (Advanced - C1)
